

Upper West River & Johns Creek Dredging Spur

Data Sheet

Please collect as much of the information listed below:

- Copy of the Location Survey for your property.
- Complete the Vessel & Mooring Survey and identify the number, size and maximum draft of your boat(s).
- Photos of historic use and previous water depths (back to January 1, 1972)
 - Photos of boats docked at pier (including pictures of parties or people with boats in background)
 - Old boat ownership records and documents [Can be obtained by contacting DNR 1-877-620-8DNR (8367)]
 - Old permits
 - Written testimony from current or previous owners providing specific boat ownership, details, size, draft, operating details, years of operation etc.
- Measure the water depths taken at mean low water (an average low tide) around your pier and in the area of proposed spur dredging.
- Length and width of your existing pier.
- Measurements for existing structures such as bulkheads, revetments, mooring piles, boathouses, sheds, etc. on or near your shoreline.
- The distance from your pier and/or proposed dredging to your side property lines.
- Current or old pier or bulkhead permits.
- The names and addresses of adjacent property owners.
